# KAMAL JETWANI

*B.Tech Computer Science & Engineering (Data Science)*

Jaipur, Rajasthan | 8000886061 | kamaljetwani100@gmail.com | Portfolio | GitHub

## SUMMARY

B.Tech Computer Science & Engineering undergraduate specializing in Data Science, with hands-on experience across Python, SQL, Machine Learning, and full-stack web development. Completed internships in AI web development and data science, and built 6+ projects spanning predictive modeling, explainable AI, and full-stack applications. Seeking a Software Development or Data Science internship to contribute to scalable, data-driven solutions.

## TECHNICAL SKILLS

- **Programming:** Python, JavaScript, C++, Java, HTML5, CSS3
- **Data Science / ML:** Pandas, NumPy, Scikit-learn, LightGBM, XGBoost, SHAP, Machine Learning, Data Analysis, Data Visualization
- **Web Development:** React.js, Node.js, Express.js, Django, REST APIs, Responsive Web Design
- **Databases:** MongoDB, MySQL
- **Tools & Platforms:** Git, GitHub, Streamlit, Netlify, Render, VS Code, Microsoft Excel
- **AI Tools:** ChatGPT, Claude, Gemini, Prompt Engineering, Generative AI

## EXPERIENCE

**Data Science Intern** | *Xylofi AI, India* *Apr 2026 – Jun 2026*

- Built and evaluated Machine Learning models including Logistic Regression, Random Forest, and Gradient Boosting for telecom customer churn prediction.
- Performed data cleaning, preprocessing, feature engineering, and exploratory data analysis (EDA) using Python, Pandas, NumPy, and Scikit-learn.
- Evaluated model performance using ROC-AUC, Confusion Matrix, Precision, Recall, and F1-Score.
- Created insightful visualizations and feature importance analysis to support data-driven decision-making.

**AI Web Development Intern** | *InAmigos Foundation, India* *Jun 2026 – Jun 2026*

- Developed responsive websites using HTML, CSS, and JavaScript following modern UI/UX principles.
- Assisted in building AI-assisted web solutions and enhancing user experience across multiple projects.
- Collaborated with the development team on testing, debugging, deployment, and project implementation.
- Utilized Git and GitHub for version control and efficient project collaboration.

## PROJECTS

**DevHire AI Job Tracker (Live Demo)** *Jun 2026*

*React.js | Node.js | Express.js | MongoDB*

- Built a full-stack AI-powered job application tracking platform using React.js, Node.js, Express.js, and MongoDB.

- Implemented JWT authentication, role-based access, CRUD operations, advanced search, filtering, and application status tracking.
- Designed an interactive dashboard with analytics to monitor job applications, interviews, offers, and rejection trends.
- Developed RESTful APIs and optimized MongoDB queries for secure and efficient data management.
- Deployed the production-ready application on Netlify with GitHub version control and a responsive UI across devices.

**Financial Fraud Detection System using Explainable AI (Live Demo)** *Apr 2026 – May 2026*

*Python | Scikit-learn | LightGBM | XGBoost | SHAP*

- Developed an end-to-end fraud detection system using Python, Scikit-learn, LightGBM, XGBoost, and SHAP Explainable AI.
- Processed 280K+ transaction records with data preprocessing, feature engineering, and SMOTE for class imbalance.
- Achieved strong fraud detection performance using ensemble machine learning models and rigorous evaluation metrics.
- Built an interactive Streamlit dashboard for real-time prediction, feature importance analysis, and business insights.

**Mentor Connect Web Application (GitHub)** *Mar 2026*

*HTML | CSS | JavaScript | Node.js | Express.js | MongoDB*

- Developed a full-stack mentor booking platform using HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB.
- Implemented user authentication, mentor management, profile creation, and booking functionalities.
- Designed REST APIs, integrated backend services, and optimized database operations for a seamless user experience.
- Deployed the application on Render and managed source code using Git and GitHub.

**Customer Churn Prediction using Machine Learning (GitHub)** *Apr 2026 – May 2026*

*Python | Pandas | Scikit-learn*

- Built a customer churn prediction model using Python, Pandas, Scikit-learn, and Machine Learning algorithms.
- Performed data cleaning, feature engineering, exploratory data analysis (EDA), and model evaluation.
- Trained and compared Logistic Regression, Random Forest, and Gradient Boosting models using ROC-AUC and F1-Score.
- Generated actionable insights through confusion matrix, ROC curves, and feature importance visualization.

## CERTIFICATIONS & ACHIEVEMENTS

- **Python Essentials 1 (Certificate)** — Cisco Networking Academy — covered Python fundamentals including data structures, functions, loops, file handling, and object-oriented programming.
- **Smart India Hackathon (SIH) 2025 (Certificate)** — Preliminary Round Participant — collaborated on an innovative solution for a real-world problem statement, applying research, problem-solving, teamwork, and technical presentation skills.

## EDUCATION

**Swami Keshvanand Institute of Technology, Management and Gramothan** *2025 – 2029*

Bachelor of Technology (B.Tech), Computer Science & Engineering — CGPA: 7.3

**IGM Senior Secondary Public School, Mansarovar** *2023 – 2024*

Senior Secondary (XII), RBSE — 85.60%

**IGM Senior Secondary Public School, Mansarovar, Jaipur** *2021 – 2022*

Secondary (X), RBSE — 78.60%
